Volpe
CDM

We are requesting **ALL CLEAN-UP DOCUMENTS IN REGARD TO THE
CLEAN-UP PROCEDURES ON OUR PROPERTY**, address 5000 Hi-way 37 N.
known as the former screening plant property.

You have talked about a "Geographic Information system" that would allow you folks to
record data about each clean-up.

Our exposure to contaminated soil on two different occasions over the past two months
has caused us to wonder if such a system had been put in place at our property at the
former screening plant.

Perhaps as the contaminated soil was removed it was recorded and similarly the amount of
clean soil was mapped on the property and surveyed out to show its current depth.

We would like to request any information which you might have to that would reduce any
future exposure to underground contaminated material.

Thank you,

Mel & Lerah Parker
